

# London Middlesex Master Gardeners

## Presentation Library – 2021

**We do online talks too!** All presentations are now available as webinars with time for Q & A. In the interest of staying 'green', audience handouts may also be provided on the London Middlesex Master Gardeners website [www.londonmiddlesexmastergardeners.ca](http://www.londonmiddlesexmastergardeners.ca)

\* New Presentations

\*\* Presentations in Development (let us know if one interests your group and we'll get it ready sooner)

### General Garden Knowledge

#### **Attracting Pollinators – must haves for our gardens!**

Your garden needs pollinators so we will tell you how to attract these wonderful creations which will benefit your garden and provide enjoyment too!

#### **Garden Maintenance – don't make it harder than necessary.**

Some of those garden chores are not so fun. This presentation will tell you how to maintain your garden the easy way.

#### **Latest Dirt on Soil – key facts and how to amend it.**

Healthy soil is the key to having a successful garden. You must build on a good foundation so we will tell you how to do this.

#### **Dealing with insects – Integrated Pest Management.**

No one likes to deal with pesky insects in their garden. There is an approach to creating a healthy balanced garden.

#### **Growing from Seed – how to succeed!**

Growing from seed is a fun activity that not only provides wonderful plants for your garden, but it also gives you the satisfaction of knowing you can bring life to your garden and reap the benefits! We will provide tips on how to do this successfully.

#### **Vegetable Gardening – grow something edible!**

There is much satisfaction in growing your own vegetables that you and your family can enjoy. We will provide tips on how to do this so you can have a successful harvest.

#### **Weeds! New ways to manage old problems!**

A presentation about how to manage weeds successfully. Weeds are an age-old problem in the garden, and we will show you effective ways to manage them.

## Lawns, Shrubs and Trees

### **Healthy Lawns... or Alternatives.**

This presentation talks about everything you need to know to have a lush green lawn. We will also tell you about some good alternatives to having a lawn.

### **Pruning techniques and timing.**

We will provide you with the who, what and when to prune your trees and shrubs. Let's take the mystery and anxiety out of pruning.

### **Shrubs for Design. Add landscape bones and seasonal interest.**

Shrubs are part of the essential 'bones' of a landscape. Learn how to design your beds, hedges and borders with them. Choose the right shrub for your yard for size, shape, colour, eco-friendliness and even winter interest. Also includes some basics of planting, pruning and maintenance techniques.

### **Living under a Walnut Tree – tips on what to grow and know about Walnut Trees.**

If you have Walnut Trees on your property or within 50 feet of your property, you're going to want to hear this presentation. We will fill you in on these unique native trees and tell you what to plant so your garden will thrive in harmony with these wonderful trees!

## Specialty Gardening

### **Container Gardening...there is no limit!**

This presentation covers everything there is to know about container gardening. No space is too small to have a thriving garden and there is no limit to the containers you can use!

### **Botanical Delights – growing flowers you can eat.**

This presentation provides insight into the flowers you can grow that are edible. You may be surprised to learn some of your favourite flowers you can eat!
